Table 18: Control Function — Fascist Branch

	(1) Statutes / Full	(2) Statutes / Sel.	(3) MdP / Full	(4) MdP / Sel.
<i>Panel A: First Stage (Logit)</i>				
Instrument	0.248* (0.134)	0.454* (0.236)	-2.206 (1.633)	-87.106 (57.575)
<i>Panel B: Second Stage</i>				
Mutual Aid Society	0.819*** (0.112)	0.552** (0.225)	0.017 (0.172)	-0.365 (0.382)
CF Residual ($\hat{v}$)	-0.797*** (0.112)	-0.555** (0.234)	-0.004 (562.020)	0.259 (1803.775)
Observations	4836	810	124	62
Mean(D)	0.244	0.576	0.244	0.576
Mean(Outcome)	0.152	0.482	0.152	0.482

Notes: Control function estimates with logit first stage. Panel A reports logit coefficients on the instrument. The generalized residual $\hat{v}_i = D_i - \hat{p}_i$ enters the second-stage OLS directly; its coefficient ($\hat{\rho}$) provides a test for endogeneity ($H_0: \rho = 0$). Standard errors via block bootstrap (500 replications) at the province level. Controls selected via double LASSO (Belloni, Chernozhukov Hansen, 2014). All specifications include province fixed effects. Selected sample: municipalities with $\text{ipop1911} > 8.5$ ($\approx$ pop. 5 000). * $p < 0.1$; ** $p < 0.05$; *** $p < 0.01$.

Table 19: 2SLS — Fascist Violence

	(1) Statutes / Full	(2) Statutes / Sel.	(3) MdP / Full	(4) MdP / Sel.
<i>Panel A: First Stage</i>				
Instrument	0.070*** (0.022)	0.094** (0.045)	-0.245*** (0.085)	-0.189* (0.097)
<i>Panel B: Second Stage (LATE)</i>				
Mutual Aid Society (instrumented)	-0.188 (0.131)	0.004 (0.123)	0.323* (0.190)	0.140 (0.222)
Observations	4838	812	174	135
First-Stage F-stat	18.57	6.28	7.8	4.13
Mean(D)	0.244	0.576	0.244	0.576
Mean(Outcome)	0.048	0.102	0.048	0.102

Notes: Standard two-stage least squares with linear first stage. Clustered standard errors at the province level in parentheses. Controls selected via double LASSO (Belloni, Chernozhukov Hansen, 2014). All specifications include province fixed effects. Selected sample: municipalities with $\text{lpop1911} > 8.5$ ($\approx$ pop. 5 000). * $p < 0.1$; ** $p < 0.05$; *** $p < 0.01$.

Table 20: Control Function — Fascist Violence

	(1) Statutes / Full	(2) Statutes / Sel.	(3) MdP / Full	(4) MdP / Sel.
<i>Panel A: First Stage (Logit)</i>				
Instrument	0.246* (0.133)	0.455* (0.241)	-3.403* (1.764)	9.896 (13.891)
<i>Panel B: Second Stage</i>				
Mutual Aid Society	0.026 (0.039)	0.018 (0.050)	0.088 (0.058)	0.018 (0.187)
CF Residual ($\hat{v}$)	-0.017 (0.040)	0.005 (0.050)	-0.130 (169.956)	-0.021 (1204.572)
Observations	4838	810	124	62
Mean(D)	0.244	0.576	0.244	0.576
Mean(Outcome)	0.048	0.102	0.048	0.102

Notes: Control function estimates with logit first stage. Panel A reports logit coefficients on the instrument. The generalized residual $\hat{v}_i = D_i - \hat{p}_i$ enters the second-stage OLS directly; its coefficient ($\hat{\rho}$) provides a test for endogeneity ($H_0: \rho = 0$). Standard errors via block bootstrap (500 replications) at the province level. Controls selected via double LASSO (Belloni, Chernozhukov Hansen, 2014).
